

Each ring corresponds to the inner diameter of the ring and the number in the center indicates the circumference (or metric). After printing this page to scale, take a wedding band that is worn on the same finger and on the same hand as the Messika ring you want. Position the ring over the circles below to determine the diameter that corresponds to your ring: the diameter of the circle must be perfectly in line with the inner circumference of the ring. If your ring is between two sizes, choose the larger size.

HAS IT BEEN PRINTED CORRECTLY TO SCALE ?

To check whether the ring sizes have been correctly printed at 100%, use a ruler to measure the scale above.

It should measure 5 cm.
